

There will be an upgrade to the Treasury's **Pay.gov** software this weekend. This release contains a new field to enable the collection of the security code that appears on the back of your credit card. The population of this field is **optional**, however, the new Pay.gov help screen indicates the field is required. This is a security upgrade that can be used if a cardholder disputes or questions a transaction. Without the code present, the bank may not be able to reprocess a chargeback. A screen shot of the new Online Payment page in CM/ECF is below. Please call 423-752-5163 ext. 2250 with any problems you may encounter when making a payment.
